

# salesnet<sup>®</sup> Local Backup

## by Village Software

### What is it?

**Salesnet<sup>®</sup> Local Backup (SLB)** software automatically creates backup copies of all your Salesnet data as Excel spreadsheets.

#### What SLB does for you:

- Creates automated, routine backups of your Salesnet database
- Exports to Microsoft Excel & Access

#### From there, you can:

- Audit trail & local data process
- Integrate with in-house systems
- Build custom reports

### What Salesnet data does SLB Capture?

- **Core Data:** Accounts, Contacts, Deals
- **Extra Information:** Tasks, Appointments, Multi-notes
- **Configuration Details:** Owners, Positions, Process Definitions

### Why SLB?

**Salesnet Local Backup** is an affordable software product built specifically to integrate with the Salesnet<sup>®</sup> platform. Whether you're creating offline backups or building custom reports, SLB gives you all the flexibility you need to take control of your data.
